

WD Compatibility Summary

WD Drive Model: WD2002FYPS
Firmware Revision: 04.05G05

The chipsets, host adapters, and RAID controllers listed below have been tested with WD drives for data integrity, interoperability, and compatibility, and any special conditions observed are noted in the comments section of the list below. WD makes no warranty, implied or otherwise, regarding the compatibility, performance or reliability of these products. For optimal capability, WD recommends that the firmware version be no less than the minimum revision level shown above. For technical support, visit support.wdc.com.

Manufacturer	Model	Device Type	Interface Type
3Ware (now LSI)	9500S	RAID Adapter	SATA I
	9550SX	RAID Adapter	SATA II

	SuSE Enterprise Linux 10 w/ sp2 x86 & x64	Operating System	
FreeBSD	6.3	Operating System	

* These controllers are only compatible with the WD2002ABYS if the drives are connected to an expander, or if the drives are connected to the controller with the link speed changed from 3.0 Gb/s to 1.5 Gb/s.

** This configuration requires newer controllers (built after November 30, 2009) from Adaptec for SATA 3G speed compatibility. On previous controllers, changing the link speed from 3.0 Gb/s to 1.5 Gb/s will enable compatibility.
